

## Hi-Capacity Mobility Chair

**Fully electric operated chair designed to meet the requirements of your Bariatric Patients**

The safe lifting capacity of 350kg helps reduce unnecessary patient handling while minimising back strain and injury on the practitioner.

The Hi-Capacity Mobility Chair can be laid flat for patient transfer from bed or gurney, the patient can then be re-positioned using the all electric adjustments reducing staff effort, OH&S concerns and saves patients dignity.

Fold out the two footplates, connect a Staminalift bed mover and the unit doubles as a motorized wheelchair.

This chair is also being used as patient seating in Bariatric wards.

### Features
