

## Multi Therapy Chair

**Perfect for use in Medi-Spas, multi-function room and for esthetic or Podiatry Procedures.**

The focal point is the double lifting column which allows maximum balance during high pressure procedures and shortens the distance between practitioner and client to provide unmatched ergonomic accessibility.

The electric cardiac chair position helps reduce pressure on the clients spine, relieving muscle tension allowing them to be completely relaxed during procedures.

The chair can quickly and easily convert into a comfortable treatment or massage table within seconds making it a complete multi-function chair to share between practitioners.
